

# **CANCARE**

## **DEPARTMENT OF ZOOLOGY 2019-20**

A cancer survey was conducted by our students on 26-10-19 at Chowannur Grama Panchayath as a part of Academic extension & Health programs for the residents of Chowannur Grama Panchayat. It was a programme intended to give people cancer awareness as well as to know about the extent of the disease in that region. The survey conducted by the department helped to gain an insight on the spread of cancer among the people of that area. It was found that area has relatively lesser number of cases.
